Comments: (If possible, please reference section number and/or page number in document if applicable.)

1 Nevada is a place where people live. I plan on living here late into my life. Although Yucca Mountain may be quiet now; later, earthquakes and volcanoes may erupt. September 30th in Japan a nuclear accident occurred producing fatalities. What makes you think that a similar situation won't arise at Yucca Mountain? What I don't understand is why you can't store the waste on site until it is cooled. Do you understand how many people have been hurt and could be killed when/if this project does not find other alternatives!

2 Out of the research that I have done about the Yucca Mountain, it seems as though your organization has not researched the history of the land around Yucca Mt. So before you contaminate our land, do some research on our land, and for once think of someone other than yourselves.

Please note: For your comment(s) to be considered in the Final Environmental Impact Statement, your comment(s) need to be received by the Department of Energy by February 9, 2000. To the extent practicable the Department will consider comments received after February 9.

Please feel free to attach additional pages; more postage may be needed. If you prefer to mail your comments, you may use the back side of this sheet as a postage-paid, self-mailer. To do so, fold in thirds along the dotted line so address and postage-paid notice are visible; then secure with tape.
